Reducing Bush for Diamond Blades

Beava diamond blade bore reducing bushes (also called reducing rings) are designed to precisely adapt the arbor (bore) size of a diamond blade to suit different saws or cutting machines. Manufactured to high tolerances, these durable inserts ensure a secure, vibration-free fit between the blade and spindle, improving cutting accuracy and extending the life of both the blade and the machine.

Ideal for professional and DIY users who need flexibility when mounting blades across multiple machines, these bushes are quick to install and reusable.

83398	Beava 45mm M14 Wet/Dry Porcelain Drill Bit	31.72

DIAMOND TIPPED

NO WATER REQUIRED

Top Tips:

- Drill bits last longer if kept cool with water.
- Start drilling 45° to the tile. Slowly bring the drill to 90° to the tile and drill as normal. Move the drill in an oscillating motion for best results.
- Drill at approximately 2000 rpm.

Porcelplus **Mega Hard Drills for Porcelain** 6mm & 8mm

The 6 and 8mm Porcelplus Drill Bit comes with 2 x 4mm pilot hole drill bits. For best results with porcelain tiles, pilot the 4mm and then follow with the 6mm or 8mm. These drill bits will last longer if kept cool with water but are not water fed - life expectancy of these drill bits is between 10 - 15 holes.

FEATURE:

- Comes with Two 4mm Pilot Drills

SKU	Product Description	Price (inc VAT)
83430	6mm Porcelplus Drill (with 2 x 4mm)	20.80
83431	8mm Porcelplus Drill (with 2 x 4mm)	22.87
83432	Spare 4mm Porcelplus Pilot Drill	8.16

Porcelplus Extra Dry **Professional Diamond Drills** 6mm, 8mm, 10mm & 12mm

Designed for drilling holes in porcelain tiles. Fits onto the end of a standard drill chuck and is wax filled so can be used wet or dry.

EXCELLENT FOR DRILLING PORCELAIN:

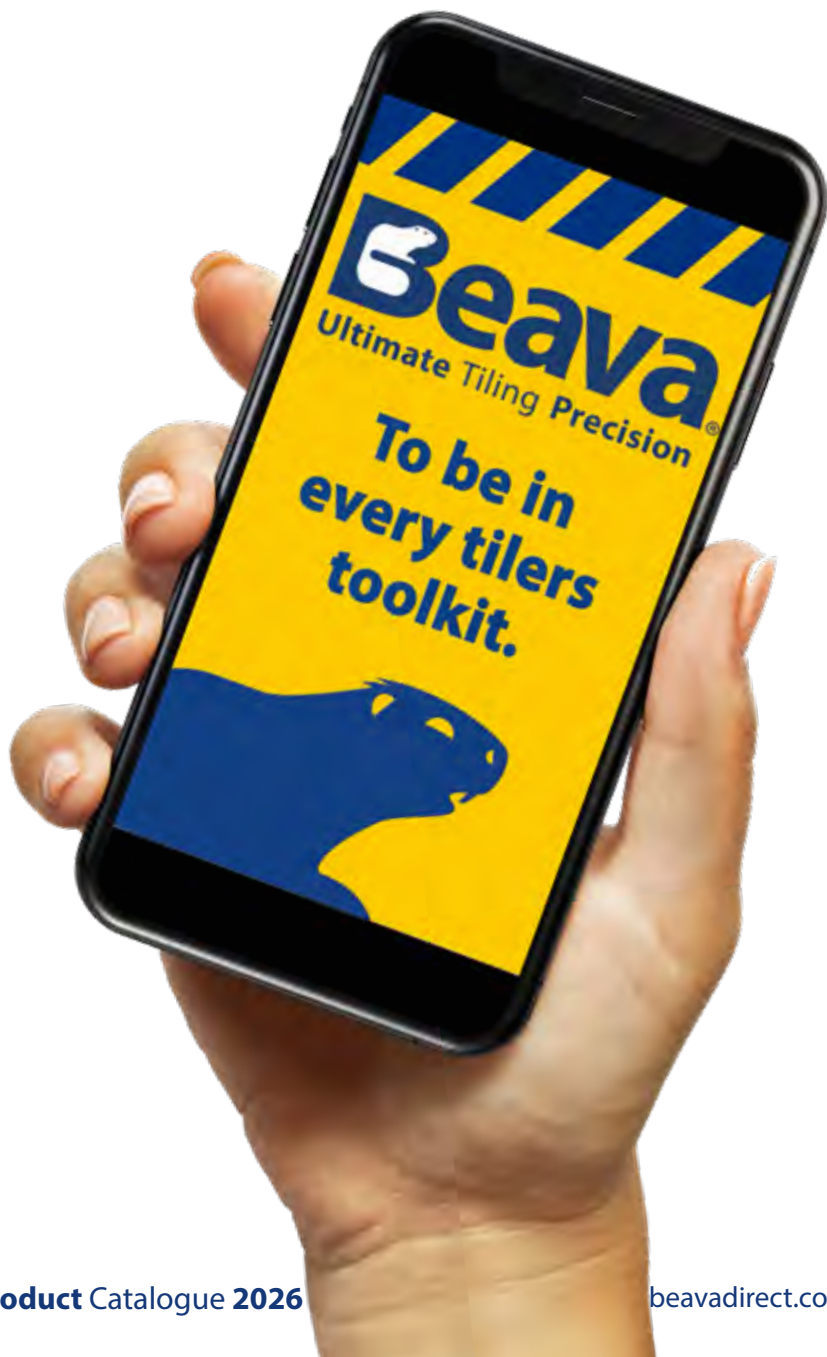

- Drill Porcelain with Ease
- Integral Cooling
- Fast Drilling
- Wet or Dry

SKU	Product Description	Price (inc VAT)
83390	6mm Beava Porcelplus Dry Diamond Bit	29.32
83391	8mm Beava Porcelplus Dry Diamond Bit	29.32

TILE NIPPERS

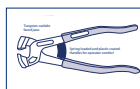

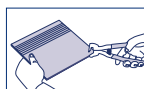

Tile Nippers

The Beava ceramic tile nippers are a versatile tool for adjusting and refining ceramic tile cuts, particularly for tile and glazed stoneware.

Ideal for professional use, the Beava nippers are perfect for fine-tuning cuts that manual cutters can't handle or making small adjustments without needing larger tools.

The ergonomic, bi-material coated handles offer superior comfort and reduce effort during use.

SKU	Product Description	Price (inc VAT)
83232	Beava Tile Nippers	17.00

Key Features:

- ✓ Durable tungsten carbide cutting edges.
- ✓ Perfect for straight cut adjustments in tiles and ceramic flooring.
- ✓ Long-lasting and designed for precision.

SUCTION CUP TILE LIFTER

Suction Cup Tile Lifter

With the rise of large-format tiles and textured surfaces, suction cups have become essential tools for tiling professionals. The Beava suction cup tile lifter features a concentric lip design and is ideal for managing rough or slightly structured tiles. It also has a durable polymer chassis and an ergonomic handle for enhanced comfort and safety, reducing the risk of accidental suction release. For heavier materials, the vacuum pump suction cup adapts to smooth, rough, or textured surfaces, offering a 200mm diameter for large tiles, a single-finger pump activation, a safety loss indicator, and a pressure release valve for easy detachment. It comes in a protective case to ensure reliability and safe transport.

RUBBER Mallet

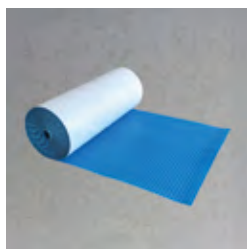

Rubber Mallet (black & white head)

This high-quality rubber mallet features a dual-colour head, combining both black and white striking surfaces for versatile use. The black side offers a firmer impact for tasks requiring a bit more force, while the softer white side is designed to minimize surface marks and damage. Perfect for setting tiles, and delicate projects where controlled force is essential. The ergonomic, non-slip handle ensures a comfortable and secure grip.

TradeMAT

PROFESSIONAL DECOUPLING & ANTI-CRACK MOVEMENT MATTING

TradeMAT

Protect your tiled surfaces with confidence using Beava TradeMAT, the ultimate decoupling and anti-crack underlayment matting. Designed for both professionals and DIY enthusiasts, this high-performance mat isolates movement in the substrate to prevent tile and grout cracking, bridges minor substrate imperfections, and adds a waterproof layer (where applicable) to guard against moisture damage.

Supplied in a convenient 30 m x 1 m roll, Beava TradeMAT is lightweight, easy to handle, and ready to tile over immediately, making installation faster, cleaner, and hassle-free. Its versatility allows it to perform flawlessly over concrete, plywood, existing tiles, or mixed surfaces—delivering a durable, professional finish every time.

-  **Prevents Tile & Grout Cracking** by isolating movement in the substrate
-  **Bridges Minor Substrate Cracks** to protect finished surfaces
-  **Waterproof Layer Helps Guard Subfloors** from moisture damage (if applicable)
-  **Lightweight & Easy to Install** simply roll out and tile directly over
-  **Works Over Multiple Substrates:** Concrete, Plywood, Old Tile, or Mixed Surfaces

SKU	Product Description	Price (inc VAT)
83122	Beava TradeMat 30 x 1m roll	234.00

**Protect and extend
the life of your tiled
surfaces.**

Beava SandiMat®

Ultimate Tiling Precision

DECOUPLING MAT FOR TILED FLOORS

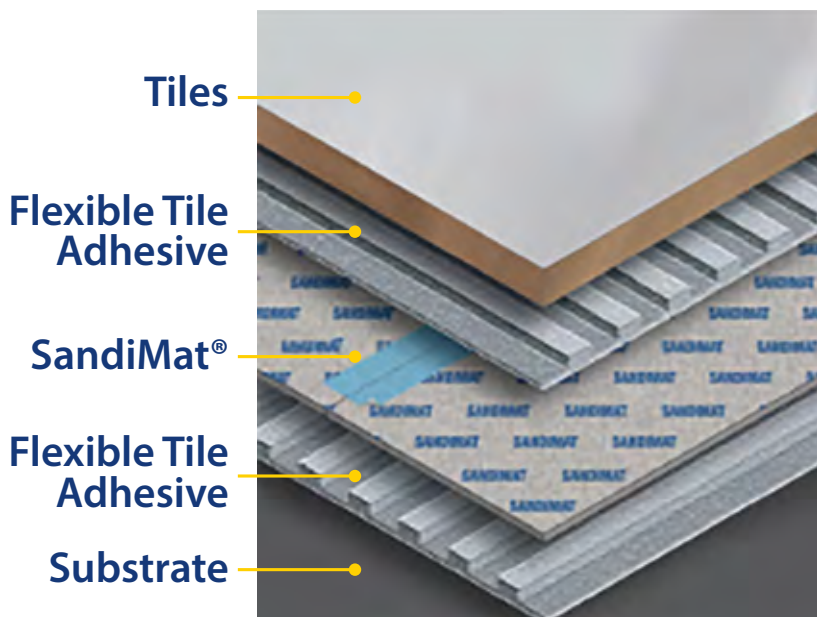

SandiMAT®

SandiMat® is a technologically advanced decoupling mat, designed to prevent the failure of tiled floors, caused by movement in solid floors, including heated anhydrite screeds.

With its high tensile strength, SandiMat® allows for lateral movement in the substrate, whilst protecting the tiled floor above.

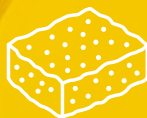

SKU	Product Description	Price (inc VAT)
83444	Beava SandiMat® 15 x 1m roll	210.19

-  Quick to install
-  Cost Effective
-  Easy to handle
-  Thin
-  Ideal for use with underfloor heating

WATERPROOFING

The UK's No.1 Bathroom, Shower Room, and Wetroom waterproofing solutions. Everything you need to supply and fit waterproofing products to ensure the best surfaces before tiling. All our waterproofing products and tapes have been designed to make waterproofing quick and easy to maximise efficiency.

WATERPROOFING

SELF ADHESIVE WATERPROOF TAPE

Self Adhesive Waterproof Tape

Providing highly-effective sealing of corners and joints, Beava Self Adhesive Waterproof Tape is a robust and totally water-resistant material. Its flexible construction and self-adhesive property makes it easy to apply and helps to ensure that a fully waterproof finish is achieved in the wetroom.

SKU	Product Description	Price (inc VAT)
83402	Beava Self-Adhesive Waterproof Tape 10m	43.19

BEAVA SELF ADHESIVE WATERPROOF TAPE

Double Sided Waterproof Tape

Double Sided Waterproof Tape is a permanently flexible upstand, for use as a first fix solution to form a 100% waterproof seal between sanitary ware and adjacent walls. Its unique self-adhesive bitumen strip on both sides of the tape means it adheres to your sanitary ware and the wall without the need for any other adhesive.

SKU	Product Description	Price (inc VAT)

5925	Megatape Waterproof Preformed External Corner	12.00

BLUETANK MEMBRANE

Blue Tank Membrane

Our revolutionary Blue Tank Membrane is a one-coat tanking membrane which dries in approximately two hours. This dramatically decreases installation time as there is no waiting period between coats.

SKU	Product Description	Price (inc VAT)
83400	Beava Blue Tank Membrane - 3kg	29.12

PRIMING TRAY & ROLLER

Priming Tray & Roller

It is well known in the tiling industry that priming before tiling has always been best practice. This makes the Beava Trays and Rollers a must have for all tilers on every job. We offer them in two different sizes: Small and large.

SKU	Product Description	Price (inc VAT)
83238	Beava Small Priming Tray & Roller	8.24
83239	Beava Large Priming Tray & Roller	11.94

Tilers Primer 1L

Our latex based SBR Primer is a must have for all professional tilers. It is applied before tiling to all porous/absorbent wall and floor backgrounds to improve the bonding strength of the tile adhesives and levellers. This primer reflects heat which enhances the insulation value of our backer boards. Our SBR Primer is ideal for use with underfloor heating, and its chemical compound is excellent for use as a waterproof coating, making it ideal for use in wet rooms and bathrooms. Can also be used externally.

SKU	Product Description	Price (inc VAT)
83322	Beava Tilers Primer 1L	15.59

Sustainability benefits of flexible packaging.

- It is a more sustainable alternative, with reduced environmental impact.
- Less water and fossil fuel consumption.

WATERPROOF KIT

Waterproof Kit

The UK's No.1 Bathroom, Shower Room, and Wetroom waterproofing solution. This tanking/waterproofing system comes with everything you need to waterproof any areas where moisture is a potential issue. Apply, let it dry and start tiling all in the same day. This kit comes complete with quartz acrylic primer to prepare the surface, high tac waterproofing tape for the corners and joints, the one-coat paint on waterproofing membrane, an application brush, gloves, and a full set of instructions.

Beava®

Ultimate Tiling Precision

BEAVA BACKER BOARDS

Beava offers fibre cement tile backer boards in both 1200x600x6mm and 1200x800x12mm boards. As the use of heavier and larger format tiles has become more and more popular over the years the use of a tile backing board is essential for any professional tiling job.

Beava[®]
Ultimate Tiling Precision

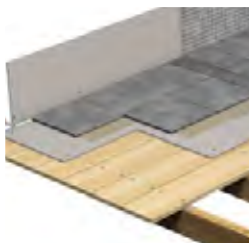

Beava Backer Boards

The Beava Backer Board is a high-density, durable board made from fibre cement. This backer board is perfect for tiling applications, providing a strong and stable surface for your tiles, ensuring long-lasting stability. The Beava Backer Board is not a pre primed tile backer board, it is perfect for overboarding timber floor prior to tiling.

The Beava Backer Board 1200x800x12mm is a high-density, durable board made from fibre cement. This backer board is perfect for wall tiling applications, and can be applied directly to wooden studwork, providing a strong and stable surface for your tiles, ensuring long-lasting performance and protection.

BACKER BOARD

Backer Board

Beava Backer Board can be applied directly to timber floors and studwork, providing a strong and stable surface for your tiles, ensuring long-lasting performance and protection. The 6mm tick boards are usually used for overboarding floors while the 12mm thick boards are mainly used for walls.

Backer Board 6mm and 12mm

- 6mm Beava Backer Board has the same strength as 15-18mm Plywood
- It is an A1 fire rated non-combustible product
- Beava Backer Board is water resistant, so will not rot, swell or delaminate when in contact with water
- It is fully waterproof when primed with the Beava SBR primer
- Priming is a necessity to adhere to most adhesive manufacturer's guarantees

"It's best practice to prime surfaces before applying adhesive and tiles. It's the professional standard"

Craig Sellers

Professional tiler since 1987

Direct Online Support

Live chat and helpline open between 7.00am-5.00pm

Direct Next Day Delivery

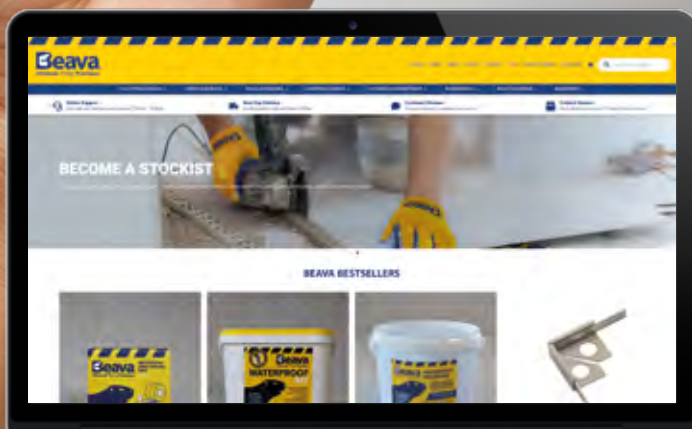

On all products ordered before 3.00pm

Direct Customer Reviews

Find out what our customers are saying

Direct Product Returns

No quibble returns, up to 14 days from purchase

Beava Top Tilers Tips

Meet Ty the Tiler and his help and advice for today's tilers!

1) Work out how much you need and add 10%

Add 10% to allow for cut pieces. This way, you won't be caught short and left ordering more.

2) Planning is crucial

Plan your tile rows well, to avoid a messy and unprofessional finish. Always tile from the centre line of a wall or floor – so that any cut pieces end up at the sides of the room, and are the same size. This will give you a symmetrical and professional finish. To help mark out your tile rows, use a tile gauge (a length of wood with the length of your tiles marked onto it).

3) Add some extra grip to slippery surfaces

Use tiles with anti-slip qualities beside bathtubs and shower areas to add extra safety, and to avoid slipping! Walls and Floors have a vast selection of anti-slip floor tiles to choose from.

4) Check before you tile

Once your tile has been delivered, check it! This is to make sure that there are no damages and to make sure all the colours match because colours and shades can vary with each batch.

5) The Good, the Bad and the Ugly

When fixing natural products, I recommend sorting your order into three piles; the Good, the Bad and the Ugly. Due to the unpredictable nature of natural stone or cork, some tiles might come out with slightly unappealing markings or crevices.

6) Prepare your surfaces

Before starting, ensure your surfaces are suitable for tiling onto. Before starting, ensure your surfaces are suitable for tiling onto. Make sure the wall or floor is dry, flat and solid (no movement) the Beava Backer boards are the best solution for this, please see page 49.

If your wall is uneven, you may need to plaster before tiling. Likewise, if your floor is not level, you may need to look into using a levelling compound or screed.

7) Use tile spacers

Tile spacers are essential for all tiling projects, they make sure you get consistent gaps between your tiles so you never go out of line. The MaxiLevel spacers on page 11 not only make sure your spacing is all correct but they also create a perfect level and flat surface. Ideal for when you are using large format tiles.

8) Use waterproof adhesive and grout

When it comes to tiling areas that are going to be subjected to water – such as the wall space next to your shower – it's important to use water resistant adhesive and grout. This will help to keep the moisture on the surface of the tile, rather than allowing it to seep underneath.

9) Tiling around toilets and basins

When you tile a bathroom, you will inevitably arrive at a toilet or basin. Tile up to these obstacles using whole tiles, rather than trying to lay your cut pieces first. Lay as many whole pieces around the toilet and basin as you can. Leave them to set, before approaching your cut pieces. It will make it a lot easier to shape your cut pieces correctly.

10) Dispose wisely

When you've finished your tiling project, and there's a little bit of adhesive or grout left in the bottom of the tub, do not put it down the drain or toilet. It will block the pipes. Instead invest in a BeavaTub on page 45, so you can leave the adhesive or grout to harden, then tip it out and either bin it or dispose of it as hardcore.
